

May 10, 1957

Subject: CONTRACT SC-56

Dear Doug:

Our records do not show receipt this date of the Service Technicians' Payroll for our Detachment "A" during the period February 3 to March 2, 1957. We have, however, received the payroll for the period March 3 to March 31, 1957. Will you please advise the status of this February payroll. We would appreciate receipt of a photostatic or other copy if the usual copy is not available.

We also have a payroll problem whenever one of our men temporarily or permanently interrupts his term of employment. While he is on duty we have been deducting a specified amount from his weekly paychecks on the assumption that he will be paid a comparable amount at his place of duty. This is verified upon our receipt of the monthly Service Technician Payrolls, and we reduce the Company's liability to the employee for amounts withheld accordingly. The normal flow time for these payrolls to reach us has been about 30 days. This means that we are that far behind in maintaining a current record of amounts deducted versus amounts paid at place of duty. When the employee remains at his place of duty the specified delay presents no problem.

However, when the employee interrupts his term of employment and returns to sever his connection with our project we do not have a current record to prove the extent of our liability to him (or his liability to us if such be the circumstances). I would appreciate it if you would consider having the Detachment Finance Officer send us a TWX specifying the individual amounts paid to the employee during the past sixty days (this will allow for overlong delays in the mail service).

As you probably can visualize we will also have similar difficulties if an employee permanently transfers between detachments. Under those conditions we would also appreciate receiving a TWX.
